Patent Appln. No. 10/065,280  
13341.19

wherein the longitudinal axis of the barb is not parallel to the longitudinal axis of the body of the suture. Since Sulamanidze and Alcamo show only patterned barb dispositions and barbs generally aligned with the longitudinal of the suture, Applicants respectfully submit that claims 1-3 now distinguish over the references. Applicants note that the Examiner indicated during the interview that the claimed twist cut multiple spiral barb disposition recited in claims 1-3 distinguishes over the prior art.

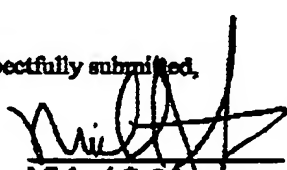

Therefore, because neither Sulamanidze nor Alcamo, alone or in combination, teach or suggest the elements of claims 1-3, Applicants respectfully request withdrawal of the present rejection and allowance of claims 1-3. Claims 12-15 depend from claim 1 and should be allowable for the reasons discussed above with respect to claims 1. Similarly, new claims 28-30 depend from claims 1-3, respectively, and should be allowable for the reasons discussed above with respect to claims 1-3.

Applicants note with appreciation that the Examiner has found Claims 4-11 and 16-27 to be allowable over the art of record. Hence, applicants respectfully submit that the case is in condition for allowance and allowance is earnestly solicited. If the Examiner should have any questions of a minor nature after reading the above, the Examiner is respectfully requested to telephone the undersigned in order to attend to any such minor issues and obviate the issuance of another Office Action.
